QUALIFICATIONS

Senior software automation engineer and full-stack web developer, with a decade of professional experience in production service support and software development. Expertise in designing intuitive, web-based applications, and developing software automation solutions. Created new and supported existing applications in both small business and enterprise production environments. Works well in a team and lead development efforts, as well as work individually to complete projects and goals.

SKILLS | TOOLS | CERTIFICATIONS

- Extensive experience in modern HTML5/CSS3/ES6 programming, PowerShell Automation, Vue 3, Node/Express, websockets, and PHP 8+.
- Experience in both MPA and SPA web applications, including PHP/Laravel, C#/.NET/WPF, and ASP.NET Core.
- Experience in both Windows Server and Linux container cloud environments, as well as moderate experience in macOS environments.
- Proficient in Azure DevOps, Azure Portal, GitHub, VS Code, Visual Studio Professional.
- Certified in Azure Fundamentals (AZ-900)

EXPERIENCE

- **SENIOR SOFTWARE ENGINEER SINCLAIR, INC. - 2023-Present**
Leading efforts on enterprise app problem analysis, automated deployment pipeline development, and IaC orchestrations. Created consolidated status dashboard app for enterprise services/vendors. Developed and designed job processing system and web portal for processing sales team orders. Upgraded deprecated .NET Core web apps to newer .NET versions. Created data hygiene scripts and utilities for interactive data processing.
- **PRODUCTION SUPPORT SOFTWARE ENGINEER SINCLAIR, INC. - 2022-2023**
Provided support for new and existing enterprise apps; lead efforts in automating Entra/ServiceNow provisioning. Developed market access user/role management app for sales team. Created multiple internal scripts for data fixes.
- **AUTOMATION ENGINEER CHRISTIAN BROADCASTING NETWORK - 2018-2022**
Developed workflow solutions and programming to automate data hygiene and service monitoring. Created inter-departmental web-based service portals. Implemented API integrations between Jira Cloud and on-prem systems monitoring services. Developed and designed an audio file compression web portal for use with call center systems. Engineered, designed, and developed human resource management solution to help reduce overworking developers.

Awarded **Employee of the Month** for building and implementing an automation solution to help process mail-in money transactions.
- **APPLICATION OPERATIONS TECHNICIAN CHRISTIAN BROADCASTING NETWORK - 2017-2018**
Provided application support to users and other colleagues for both in-house and third-party software solutions. Worked with inter-departmental systems technicians, as well with software vendor support, to troubleshoot and solve various problems and issues impeding the organization's operations.
- **WEBSITE MANAGER NORFOLK WIRE & ELECTRONICS, INC. - 2016-2017**
Assisted in maintaining the code-base and provide improvement solutions for an ASP Classic-based regional website of a multi-store corporation, including designing graphics, fixing stylesheets, updating product information, and adding new features to the site.
- **CONTRACT WEB DESIGNER/DEVELOPER SELF-EMPLOYED - 2013-PRESENT**
Designed, developed, deployed, and maintained fast, responsive, and extensible websites for various companies, organizations, and individuals, providing clear and intuitive user experiences to improve the marketing and branding of each entity.
- **SYSTEMS/WEB SUPPORT C.S.GYMNASTICS INC. - 2012-2020**
Maintained and designed a medium-sized business website, provided systems support for a small office network, developed on-prem software solutions for office workers, and built/provisioned physical workstations and networked file shares.

EDUCATION

- **REGENT UNIVERSITY VIRGINIA BEACH, VA**
Graduated with B.S. Information Systems
